

WHAT YOU NEED TO KNOW ABOUT COVID-19

Get Vaccinated
and stay up to date
on your COVID-19
vaccines

TO PREVENT COVID-19

Masking is strongly recommended
regardless of vaccination status

Everyone must mask in health care and
congregate settings

Get tested
For clinics, visit
socoemergency.org/test

SYMPTOMS OF COVID-19

Shortness of breath
or difficulty breathing

Fever

Headache

Cough

Muscle pain

Sore
throat

New loss
of smell or taste

Additional symptoms: chills, runny nose, nausea, vomiting, diarrhea

WHEN DO SYMPTOMS APPEAR?

- Symptoms can range from mild to severe illness and appear two to 14 days after you are exposed to the virus that causes COVID-19.

SEEK IMMEDIATE MEDICAL ATTENTION IF YOU HAVE:

- Persistent pain or pressure in the chest
- New confusion or an inability to wake up or stay awake
- Bluish lips or face or difficulty/trouble breathing

WHAT TO DO IF YOU HAVE THE VIRUS OR HAVE BEEN EXPOSED TO COVID-19

For CASES (people who have been diagnosed with COVID-19)

For all (vaccinated, unvaccinated, boosted, non-boosted):

- **Stay home** for at least 5 days.
- Isolation can end on Day 5 (or later) if you:
 - Receive a negative result (antigen preferred); AND
 - Have not had a fever for 24 hours without taking fever-reducing medication; AND
 - Have improving symptoms or no symptoms.
- If you do not test and symptoms are not present or are resolving, isolation can end after day 10.
- If fever is present, isolation should be continued until fever resolves.
- If symptoms, other than fever, are not resolving, continue to isolate until symptoms are resolving or until after day 10.
- Wear a well-fitting mask around others for a total of 10 days, especially in indoor settings.
- Treat yourself with over-the-counter remedies to reduce your symptoms, drink plenty of fluids, and get plenty of rest.
- Stay away from the rest of your household members and do not go out in public—including going to the grocery store, gas stations or other public areas.

For CONTACTS (people who have shared the same indoor airspace with someone diagnosed with COVID-19 for a cumulative total of 15 or more minutes over a 24 hour period)

If you have no symptoms:

- You do not need to stay home unless symptoms develop.
- Test on day 3-5.
- Wear a well-fitting mask around others for 10 days, especially in indoor settings.
- If test result is positive, see CASES.

If symptoms develop:

- Test and stay home.
- If you test negative by antigen test (e.g. home rapid test), you are encouraged to retest with a PCR test.
- If test result is positive, see CASES.

You are strongly encouraged to get vaccinated or boosted if eligible.

Persons infected within the prior 90 days do not need to be tested, quarantined, or excluded from work unless symptoms develop.

Note: This guidance does not apply to those who work or live in high-risk settings as identified by CDPH:

- Healthcare settings
- Long term care settings and adult and senior care facilities
- Local correctional facilities and detention centers
- Homeless and emergency shelters, cooling and heating centers

If you live with others, stay in a specific "sick room" or area and away from other people or animals, including pets. Use a mask if you need to go out of your room and clean any shared spaces between uses. Use a separate bathroom if available.
