

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.

Tradúzcalo o hable con alguien que lo entienda bien.

### 1,2,3-Trichloropropane Monitoring Requirements

#### Not Met for Geyserville New Tech Academy During First and Second Quarter 2018

Our water system failed to monitor as required for drinking water standards during first and second quarter 2018 and, therefore, was in violation of the regulations. Although this is not an emergency, as our customers, you have a right to know, what happened, what you should do and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the first and second quarter 2018 we did not collect a 1,2,3-trichloropropane (1,2,3-TCP) for sample from Well 01 and therefore, cannot be sure of the quality of our drinking water during that time.

#### What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the calendar year 2018, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

<i>Contaminant</i>	<i>Required Sampling Frequency</i>	<i>Number of Samples Taken</i>	<i>When All Samples Should Have Been Taken</i>	<i>When Samples Were or Will Be Taken</i>
1,2,3-TCP	4 quarterly samples, 1 <sup>st</sup> sample was due between Jan. 1 to March 31, 2018 from Well 01	None	During first and second quarter	9/12/18, 12/13/18, 3/14/18, and 6/13/19

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

#### What happened? What is being done?

We missed the sampling dates for Quarter 1 and 2. We will sample through the rest of the year, beginning September 12, 2018.

For more information, please contact Jason Lish at 707-857-3592 or 1300 Moody Lane, Geyserville, CA 95441.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.*
